

Aspen S.W.I.M. Spa Collection

ASPEN SPAS

Aspen Spas developed the **S.W.I.M. Series Swim Spas** with a fresh approach.

Since we started building Aspen Spas in 1991, we've been guided by a simple philosophy: design spas and swim spas for comfort, performance, and flexibility—and build them with the best components and techniques available. We focus on design, durability, efficiency, and reliability to bring you the best S.W.I.M Spas and PARTY Spas in America, and we're continually innovating to improve your swim spa experience.

Explore the Aspen S.W.I.M. Spa Collection. Aspen offers 4 swim spa models and each one is built in 3 series, allowing you to discover the perfect combination of size, seating, and performance to fit your lifestyle.

S.W.I.M.

Swim in place for as long as you want, as hard as you want. Designed with a longer, wider swim lane, the S.W.I.M is certain to deliver the perfect aquatic workout for you and your family.

PARTY | S.W.I.M.

Whether the kids or grandkids are looking to play, or you're looking to float and soak up the sun, the PARTY|S.W.I.M. design is ideal for splashing around and has plenty of seating for the whole family.

What makes it an ASPEN SPA?

At Aspen Spas, we believe that it's not only important to use the best components when building a spa, but also to utilize the best processes and techniques. Our spa mold designs are handcrafted in house, backed by years of research and development, and reinforced by customer feedback. We are confident that our spas are not only more comfortable, but more durable, reliable, and efficient.

A Better Process, A Better Swim Spa.

S.W.I.M. Spas from Aspen Spas are Built to Last.

The shell and plumbing construction follow the same superior build process as all Aspen Spas, but the cabinet structure has evolved. Instead of an ABS pan, we use a fiberglass pan with fiberglass structural corners.

Everlast Performance Plumbing System

A more reliable plumbing system made up of the latest components and building techniques, which perform better and last longer.

Jet Bodies and Valves

No-Leak Compression Grommet Seal

Main Supply Lines

Schedule 40 Pipe with 2" Sweep Elbows

Jets Plumbing

2" Manifold System with 3/4" Schedule 40

Shurgrip Hose

Enviro Spa Construction

Aspen Spas' durable spa shells and cabinets are built to withstand the elements: cold, rain, ice, heat and humidity, all while maintaining beauty and integrity for years to come.
